SEARCH FOR GUIDED MISSILE ACTIVITY AND ITEMS OF INTELLIGENCE
INTEREST ALONG RAILROADS IN THE UST-KAMENOGORSK
TO LENINOGORSK AREA, EAST KAZAKHSTAN, USSR

Approximately 324 kilometers of railroads in the Ust-Kamenogorsk (49-58N 82-40E) to Leninogorsk (50-22N 83-32E) area were covered by good quality KEYHOLE photography on [REDACTED] 25X1D
Where possible a comparison was made with TALENT photography from [REDACTED] 25X1D
[REDACTED] which covered approximately five percent of the area.

The photography of this area was compared and studied primarily to locate and describe any unidentified, unusual installations that might possibly be related to guided missile activity and also to locate and identify any items of intelligence significance.

In the approximately 5,300-square-nautical-mile area covered by the accompanying photomosaic no unidentified, unusual installations were observed that appeared to bear any relation to the Soviet guided missile program.

The following items of intelligence interest were observed. They are numbered to correspond with numbers on the photomosaic.
